

# Night Time (BBC John Peel Session)

## Dr. Feelgood

Get up in the morning kick the covers from my bed  
The sunlight in my eyes is playing tricks with my head  
I work like a dog on the job every day  
I'm trying make some money so I can go and play  
In the night time  
That's the right time  
In the night time  
That's the right time I want to be with you in the night time  
I come home from work you know I'm tired and I'm beat  
I run in the kitchen get me something to eat  
I jump in the shower wash the world off my back  
I'm gonna get you baby that's a natural fact!  
In the night time  
That's the right time  
In the night time  
That's the right time  
I want to be with you in the night time A hundred million people they got nothing to say  
They're running around in circles they just live for today  
Stick with me baby I'll show you how to fly  
We'll make such pretty music watch the world go by  
In the night time  
That's the right time  
In the night time  
That's the right time  
I want to be with you in the night time Get up in the morning kick the covers from my bed  
The sunlight in my eyes is playing tricks with my head  
I work like a dog on the job every day  
I'm trying make some money so I can go and play  
In the night time  
That's the right time  
In the night time  
That's the right time  
Here we go
