

# Someday Soon

[Natalie Bassingthwaite](#)

Someday soon you're gonna catch that dream you've been chasing

Someday Soon

Someday Soon

Someday Soon

Someday Soon Out there in the air tonight

It's electric, it's alive

Suddenly you can see right before your eyes

A thousand candles burning bright Someday soon

You're gonna catch that dream you've been chasing

Someday soon

They're gonna write your name in the sky

All you need is just to believe it

You know you're my hero

You're gonna be a star tonight Inside feel your heart ignite

It's your time to arrive

Suddenly you can see that it's possible

And I'll be right here by your side Someday soon

You're gonna catch that dream you've been chasing

Someday soon

They're gonna write your name in the sky

All you need is just to believe it

You know you're my hero

You're gonna be a star tonight Take a step

One moment

Closer to the magic

It's just one heartbeat away

Don't give up

Embrace it

Breathe it in

Believe it

You know the way Someday soon

You're gonna catch that dream you've been chasing, yeah

Someday soon

They're gonna write your name in the sky

All you need is just to believe it

You know you're my hero

You're gonna be a star tonight Someday soon

You're gonna catch that dream you've been chasing

Someday soon

They're gonna write your name in the sky  
All you need is just to believe it  
You know you're my hero  
You're gonna be a star tonight
