Powersurge

Ultimatum

Leave, don't try
They die to get inside
A falling out, between you and your pride
No, don't go
There's something you should know
This blinding light, can tear apart your soulShattered dreams
Are not all that they seem
The light can change from white to blue to green
Left to right
There's power in the night
And the powersurge, driven by the lightPower! Building up
Power! All around you
Power! Feel it
Power! A powersurge
Power! Building up
Power! All around you
Power! Feel it
Power! A powersurgeStay away
There's something I must say
This light reduces all that's in it's way
In the dark
Ignited by a spark
A fire burns, a fire makes its markSee the flash
A mountain turns to ash
Recollection, echoes of the past
Right to left
Power's what you get
And the powersurge, Isn't over yetPower! Building up
Power! All around
Power! You feel it
Power! A powersurge
Power! Building up
Power! It's coming back
Power! Feel it
Power! PowersurgeComing out of the sun
There are battles to be won
Colors change from blue to red
Forgotten heroes, piles of dead
A mass of steel, down in flame

Powersurge remains the same
Commandeer turns to dust
The mass of steel begins to rustLeave, don't try
They die to get inside
A falling out, between you and your pride
No, don't go
There's something you should know
This blinding light, can tear apart your soulShattered dreams
Are not all that they seem
The light can change from white to blue to green
Left to right
There's power in the night
And the powersurge, driven by the lightPower! Building up
Power! All around you
Power! You feel it
Power! A powersurge
Power! Building up
Power! Coming back
Power! In the air
Power! A powersurgePower! Building up
Power! All around you
Power! Feel it
Power! A powersurge
Power! Building up
Power! Coming back
Power! In the air
Power! A powersurge
Power!
