

# Run Away With You (The Groove Remix)

## Big & Rich

Sometimes it feels just like you're so far away  
We don't take the time to say the thing we used to say  
And I can't remember the last time together lost in each other's eyes  
And it just ain't right  
Come on baby let's leave tonight I just wanna run, I just want to run away with you  
And live wide open  
Set Em On fire, crazy like we used to do  
It don't matter where we're going  
Up on a mountain, down by the beach side  
Till we find the love that we fell into  
Hey, I just wanna run, I just want to run away with you  
I just want to run away with you I miss your midnight kiss and loving you all night long  
This life's like a rip tide and we're barely hanging on  
Caught up in the worry, and always in a hurry and losing what we're all about  
Let's slow it down  
Take our love and get out of this town I just wanna run, I just want to run away with you  
And live wide open  
Set Em On fire, crazy like we used to do  
It don't matter where we're going  
Up on a mountain, down by the beach side  
Till we find the love that we fell into  
Hey, I just wanna run, I just want to run away with you  
I just want to run away with you I want to lay you down with nothing but the sound of my name on your lips  
We can let it all go and move real close and find that place again I just wanna run, I just want to run away with  
you  
And live wide open  
Set Em On fire, crazy like we used to do  
It don't matter where we're going  
Up on a mountain, down by the beach side  
Till we find the love that we fell into  
Hey, I just wanna run, I just want to run away with you  
I just want to run away with you
