Good as It Gets

Daniel Skye

Don't need to make it complicated
Yeah, think you better off with someone else
Then you change your conversation
Couple weeks off and she back on it, well

She don't even wanna know the worst part of this
20 thousand miles since the last time we kissed
She already know that I don't even wanna see her face when I leave
Cause she already know this as good as it gets

Working, working, working like I never had a job
I ain't got the time but I still push it on the clock
Started with a little bit, now I got a lot
Lately I been going and I don't wanna stop, no

Don't need to make it complicated
Yeah, think you better off with someone else
Then you change your conversation
Couple weeks off and she back on it, well

She don't even wanna know the worst part of this
20 thousand miles since the last time we kissed
She already know that I don't even wanna see her face when I leave
Cause she already know this as good as it gets

I been on the same flight and you waiting on me
It's always late night when you laying with me
I miss the FaceTime
And that's how it's always gon' be 'til the day you giving up on the day
I been on the same flight and you waiting on me
It's always late night when you laying with me
I miss the FaceTime
And that's how it's always gon' be 'til the day you giving up on the day

She don't even wanna know the worst part of this
20 thousand miles since the last time we kissed
She already know that I don't even wanna see her face when I leave
Cause she already know this as good as it gets

My passport up, jumping on the plane

She tryna ride the wave, she couldn't catch me in that 458
Cause she already know this as good as it gets
