

Wind It Up

[moe.](#)

Be on my side, I'm on your side
This time and every time
We are the same kind
We share the same mind Do that today, meet me halfway
Meet me where the summer sets
Meet me where the water falls
Meet me where the music calls
And give the clock another wind I'll meet you and that's unknown
We'll wind it up then let it go
I think you'll agree we're badder together
Then we are on our own Meet me halfway
I've got more to say
There's no time like the present I'm of the same kind
We share the same mind
Let's give the clock another wind I'll meet you in that's hard, I know
We'll wind it up then let it go
I think you'll agree we're badder together
Than we are on our own Be on my side, I'll be on your side
Be on my side, I'll be on your side
Be on my side, I'll be on your side
Be on my side, I'll be on your side Be on my side, I'll be on your side
Be on my side, I'll be on your side
Be on my side, I'll be on your side
Be on my side, I'll be on your side
