

The Void

Metric

All night, like a child
I stayed up to prove
I could keep up
All night, like a fool
I stayed up to prove
I could keep up with youAll night
All night (sing along with the band, losing my voice)
All night (? my choice)
All night (sing along with the band it was steeling my voice)What can I say
I stayed up to prove
I can keep up
I stayed up to prove
I can keep up with youAll night
All night (sing along with the band, losing my voice)
All night (? my choice)
All night (sing along with the band it was steeling my voice)(All night, all night)What can I say
I stay up to prove
I can keep up with youAll night
All night (sing along with the band, losing my voice)
All night (? my choice)
All night (sing along with the band it was steeling my voice)All night (sing along with the band it was steeling
my voice)
