

# Decom-posers (Demo)

## Haemorrhage

Six feet down rot sets in  
Putrefactive bacteria (Grows) under the marbled skin  
Acid liquid liquids and enzymes are released  
Self maceration by stale corpse fluids Deteriorated corpse... by necrosis  
Rebellious mass of grubs... Decom-poser!!!  
Swarming maggots-spoiling the dead  
Hungry insects worm-eaten brain Molten innards-fermented juices  
Rancid carrion-munched into pulp  
Sarco-blasters, larval plague  
Maggots buzzing into the grave Ashes to ashes, flesh to dust  
Cadaver's turned into a pile of grubs!!!  
Deteriorated corpse... by necrosis  
Rebellious mass of grubs... Decom-poser!!!
