

Let It Go

Stooshe

Give me your time and I'll give you that place
Something 'bout you I can look at all day
I don't know why but you fascinate me. Just be patient don't run me down
So let me do it my way, my way
We can talk or we can let it out
But I got nothing to say, to say. Live for the moment right now
We can't let this energy just die down
So let's get together and we'll find out
That it could be love but it don't have to be love
Let it go, let it go, let it go
Let it go, let it go, let it go. Nobody knows and I like it that way
The way that you roll got me feeling all day
I don't know why but you fascinate me. No more patience I want it now
So let me do it my way, my way
No more talk so I'll just act it out
When I got nothing to say, to say. Live for the moment right now
We can't let this energy just die down
So let's get together and we'll find out
That it could be love but it don't have to be love
Let it go, let it go, let it go
Let it go, let it go, let it go. Live for the moment right now
We can't let this energy just die down
So let's get together and we'll find out
If this could be love but it don't have to be love.
Live in the moment live it right now
Don't let that energy you got burn out
Take what I'm offering and you will find out
It could be love, it could be love. Live for the moment right now
We can't let this energy just die down
So let's get together and we'll find out
That it could be love but it don't have to be love
Let it go, let it go, let it go
Let it go, let it go, let it go. Live for the moment right now
We can't let this energy just die down
So let's get together and we'll find out
That it could be love but it don't have to be love
Let it go, let it go, let it go
Let it go, let it go, let it go.
