

# Speak to Me (feat. Clare Bowen)

## Nashville Cast

Light comes like it always does  
But the shadow is longer this time  
And I know as I let it go

For a minute everything was alright I'm just lying here tonight  
Just trying to hold on There's a silver light and it's trying to shine but it can't get through  
When the dark is blindin' and I can't find my way to you

Speak to me This storm took us in its arms  
And showed us just where to land  
Sometimes it takes a hurricane

To break down these walls in the sand There's a silver light and it's trying to shine but it can't get through  
When the dark is blindin' and I can't find my way to you

Speak to me I'm just lying here tonight  
Just trying to understand There's a silver light and it's trying to shine but it can't get through  
When the dark is blindin' and I can't find my way to you  
There's a silver light and it's trying to shine but it can't get through  
When the dark is blindin' and I can't find my way to you  
Speak to me
