Go

Sarah Bettens

This is when the wall comes down
This is when I give myself
To every inch of me that says
It's time to goThe voice is clear but not alone
Doubt has made my head it's home
And I can hardly hear myself explode
Someone tell me something good
Something I can really useHere I go, say goodbye to everything I know
Here I go, I love you till the end of time
I have to do this on my own
So here, here I goOn the edge of everything
The start, the end, the in between
But somewhere through my fear
I know I'm fineNothing like the way it's been
An open door I've never seen
And I can't help but wonder what's inside
Someone tell me something good
Something I can really useHere I go, say goodbye to everything I know
Here I go, I love you till the end of time
And I have to do this on my own
So here, here I goSure I guess I must be strong
But what if I am just very wrong
And what if I don't know
Where I belongHere I go, say goodbye to everything I know
Here I go, I love you till the end of time
I have to do this on my own
So here, here I go, here I go
