

Rock me

Virgin Steele

I know you wanna rock me
I know you wanna scream You're standing there
You're an angel of desire
With your blond hair
And your pouting hungry eyes Hey, you're not shy
You're ready for some action
Sweet little nymph
There's fire in your eyes I know you wanna rock me
I know you wanna scream Tonight I'm yours
Come take me if you want me
I'll do anything
To keep you satisfied Keep licking your lips
And opens your arms wider
Black leather angel
Princess of the night I know you wanna rock me
I know you wanna scream Can ya feel my love?
Does it make your body quiver?
I'm gonna love you better
Than anybody did before
Right now, so good The night was made for love
Oh sweet babe
We're gonna make love all
Tonight
Make love all night tonight I know you wanna rock me
I know you wanna scream
