Diamonds

Janet Jackson

You told me you love me You told me you care But when I'm around you It's like I'm not there I need a reminder Something I can see Something on my finger Shines so brightly Don't you know Diamonds are a girl's best friend When you go They stay with me until the end Don't you know Diamonds are a girl's best, best friend When you go They stay with me until the end Don't want your money Don't want your key Diamonds, love don't come for free Don't want your money Don't want your key Diamonds, love don't come for free They say you need some roses But roses do die You gave me some candy It melted, nice try I'm not that demanding I have simple taste I just want a token That can't go to waste Diamonds Don't want your money Don't want your key Don't you know Diamonds are a girl's best friend Don't want your money Don't want your key Don't want your money Don't want your key

Diamonds, love don't come for free
