

# When the Lights Turn Out

## Twin Shadow

Every night, when I think about  
All the things you say  
Take my words for a turn around  
Make 'em complicated You make something so right so wrong  
Play me out then drag me along When the lights turned out  
You kept so many secrets  
But I stick around  
Though jealousy and ecstasy slowly taking over me When the lights turned out  
You kept so many secrets  
But I stick around  
Though jealousy and ecstasy slowly taking over me I'm always shut down by the little things you say  
That we are less than perfect  
And I don't mind that I'm addicted to the chase  
Just make me feel it's worth it You make something so right so wrong  
Play me out then drag me along When the lights turned out  
You kept so many secrets  
But I stick around  
Though jealousy and ecstasy slowly taking over me Don't let me stand in the dark of your love  
Let me change your mind (Over, it's over)  
Let me change your mind (Over, it's Over)  
You are the one who is waiting for a  
Change your mind (Over, it's over)  
When the lights turned out  
I'll be here When the lights turned out  
You kept so many secrets  
But I stick around  
Though jealousy and ecstasy slowly taking over me
