

# The Darkest Ages

## As They Sleep

Take over the world  
Enslaved to declination  
Leave all of your hopes and dreams behind  
Make haste divide this nationTake over the world  
There is nothing left to murder  
Complete disregard for human life  
This ancient flame that still burns  
Into the darkest agesOnce more an Emperor's demise  
I've longed to turn these pagesFight as hard as a mortal man can fight  
Re-live the devastation  
A billowing smoke that haunts the sky  
This murderous confrontationA horrific sight for untrained eyes  
To forget who we were  
We try to change who we are  
Degrade the stature of lifePut a blade in the back of the truth  
And you twist the knife  
Burning temples ablaze  
While we suffer the reign  
Your people dying in vein  
The remains of a tranquil place as it falls from graceSew the fields with ashes of the infidels  
We can't go on this way, we can't go on  
Take these chains and break them at their weakest link  
We can't go on this way, we can't go onYou speak a cold dead language  
A respected language of the past  
Whose words are best forgotten  
But we all won't soon forget this wrathJust like the frailest human  
Ignoring the signs of your collapse  
You watch the blood spill over  
Inadvertently walking the same pathOpen your eyes  
We've all been force fed their lies  
Force fed their lies  
A leader who gives  
Gives everything that you want  
Can take it all away
