

Alone

Glass Hands

I'll leave it all behind, just leave it all behind
There's nothing left on my mind
And my eyes are open but I'm too lost to see
I need oxygen but I'm too scared to breathe
You're crowning your king
He kept his promise but I question his morality
Your cost to pay is more pain
Than you could ever face, yourself
Not living life so easily
I'll leave it all behind
This world is so blind
Run, like you always did
You stood aside while I crumbled to pieces
Give me an answer
Give me an answer, please
Or leave me alone
Leave me alone. You've brought this on yourself
You can't hope for a better life
So slowly burying your history
Just contemplating the time we spent
Think of all the lost nights, victimless crimes instead
Just a living corpse to me
And that's all you'll ever be
Constant karma in the rearview mirror
God, I know I'd hate to be her
Burned my name into your head,
And yet, you still just
Run, like you always did
You stood aside while I crumbled to pieces
Give me an answer
Give me an answer, please
Or leave me alone (You never were and you never will be
What you thought you were to me) You never were and you never will be
What you thought you were to me
You never were and you never will be
What you thought you were to me
Run, like you always did
You stood aside while I crumbled to pieces
Give me an answer
Give me an answer, please
Or leave me alone
Run, like you always did
You stood aside while I crumbled to pieces
Give me an answer
Give me an answer, please
Or leave me alone

Leave me alone
