Middle Of The Night

Sherwood

Tonight I'm staring at the moonlight
Tonight I'm wondering how this could've felt so right
And I could say it was a good time
But I can hardly say a thing
He's got you right where he wants you
Right where he wants youHe's going outside in the middle of the night with you
Tell me what I'm supposed to do
No I'm fine, I can go another time with you
But tell me why would I want toAnd will you still be feeling alright
In the morning with the sun creeping through the blinds?
And will you say it was a good time?
And you will you tell him anything?
He's got you right where he wants you
Right where he wants youHe's going outside in the middle of the night with you
Tell me what I'm supposed to do
No I'm fine, I can go another time with you
But tell me why would I want to
He's going outside in the middle of the night with you
Tell me what I'm supposed to do
No I'm fine, I can go another time with you
But tell me why would I want toAnd I've been away for far too long it seems
And this new group of friends is making me, ready again to leave
I'm ready again to leaveHe's going outside in the middle of the night with you
Tell me what I'm supposed to do
No I'm fine, I can go another time with you
But tell me why would I want to
He's going outside in the middle of the night with you
Tell me what I'm supposed to do
No I'm fine, I can go another time with you
But tell me why would I want to
But tell me why would I want to
