We Know

Fifth Harmony

Same words
Same thirst
Just a different nameSame jokes
Same laugh
Guess that's just your gameYou got at her
The same way you got at me
You show me everything I need to seeEven though you're so damn fine
I know I'm better off without ya
Even if you cross my mind
I would always have to doubt youI won't believe a thing you say this time
All them other girls told me how you play your game
Yeah we know all about you
I know it probably worked for you
Last time
But them other girls told me how you play your game
Yeah we know all about youOoh we know we know we know
We know we know we know yeah
All about you
Ooh we know we know we know
We know we know we know yeah
All about youFirst off you should really be ashamed
You won't entice me with that big 'ol chain
Can't have my number put that phone away
Maybe you should just stay in your laneeven though you're so damn fine
I know I'm better off without ya
Even if you cross my mind
I would always have to doubt youI won't believe a thing you say this time
All them other girls told me how you play your game
Yeah we know all about you
I know it probably worked for you
Last time
But them other girls told me how you play your game
Yeah we know all about youOoh we know we know we know (know)
We know we know we know yeah
All about you (yeah)
Ooh we know we know we know (we know, we know)
We know we know we know (yeah)
All about youÂ I won't believe a thing you say this time
All them other girls told me how you play your game

Yeah we know all about you
