

Nothing to You

Twiztid

Tell me we're not the same
Tell me we're not the same
Tell me we're not the same Chemicals in your brain
Power trip when you fall insane
You try to be something you're not
Instead of being a thing
You got looking at you in the mirror now (Tell me we're not the same)
(Tell me we're not the same) I'm falling to pieces and breaking like mirror
The world's got me covered in blood
And making a noose again
Your life is an ocean, don't drown if you can
I'm sure that means nothing to you, nothing to you You said you're feeling ashamed
To me everybody feels the same
Differences in time, around, we're not backing down
We got nothing else left to (lose!) (Tell me we're not the same)
(Tell me we're not the same) When you're alive, I feel like I died I'm falling to pieces and breaking like mirror
The world's got me covered in blood
And making a noose again
Your life is an ocean, don't drown if you can
I'm sure that means nothing to you, nothing to you I'm falling to pieces and breaking like mirror
The world's got me covered in blood
And making a noose again
Your life is an ocean, don't drown if you can
I'm sure that means nothing to you, nothing to you I'm falling to pieces and breaking like mirror
The world's got me covered in blood
And making a noose again
Your life is an ocean, don't drown if you can
I'm sure that means nothing to you, nothing to you (Tell me we're not the same)
(Tell me we're not the same)
