

Dig

Steel Train

Dig, I dig a girl who's on her own
Smiles at the lonely folk
'Cause she's got nothing figured out I laugh 'cause I don't wanna cry no more
I laugh because I've hit the floor
Wiping stains from the bullets of a bang And when you're down and out of touch
I'll be waiting at that dock
The storm will clear and your ship will come to town And when the tides don't go your way
And the sun don't shine for days
Which someday I will make her free
And Scarlet you had a real friend in me Love is lying in the strangest place
Is crying 'cause it has no face
Faceless is the pain inside my gut And I dig the girl who sang me lullabies
Let me kiss her tired eyes
Tired I've been since she's gone And when you're down and out of touch
I'll be waiting at that dock
The storm will clear and your ship will come to town And when the tides don't go your way
And the sun don't shine for days
We're singing our way to FLA
You know I had a real friend in you And when you're down and out of touch
I'll be waiting at that dock
The storm will clear and your ship will come to town And when the tides don't go your way
And the sun don't shine for days
Well, don't you worry, girl
I'll be near, I'll be around If you're lost, I'll be found
Between us
Oh, my Scarlet you had a real friend in me
So don't go crying
