

Be With Me

Vast

You were standing in a dark club
down in new orleans
you were walking by a cafe
on a paris street
be with me
protect me from the darkness of the sun
be with me
right now i just need to be with someone
saw you lying on the soft bed
i had made for you
words unspoken
are the only words i know are ture
be with me
you are the flower in a desert sea
be with me

until the time decides that i will leave
it will leave
be with me
saw you laughing
under the heavy london winter sky
saw you disappear
into the coldness of the morning light
be with me
protect me from the darkness of the sun
be with me
right now i just need to be with someone
oh with someone
be with me
be with me
