

Black of Night

King Diamond

I need light, I need light
To find my way around this house
I'm turning on the chandelier
Nice bright light for me to see Little footsteps coming from the hallway
Oh no, the lights are flickering
Oh no, the lights are out In the black of night, oh, it's so hard to see
In the black of night, I see the moon
In the black of night, oh, the moon is full In the black of night, oh, it's so hard to see
In the black of night, I see the moon
In the black of night, oh, the moon is full My black cat magic
Mesmerized by something in the hallway
Who's to say what's living in the darkness?
Who is to say if a black cat can sense it? I need light, I need light
To find my way around this house
Oh, there's a candle
Just a little light so I can see again Little footsteps coming from the hallway
Oh, oh, something hit me on the head
Oh, oh, there it is again In the black of night, ooh, it's so hard to see
In the black of night, I see the moon
In the black of night, oh, the moon is full In the black of night, oh, it's so hard to see
