One Day, Robots Will Cry

Cobra Starship

This won't hurt more than a pinch
So just pour a drink, let's talk it over
I'm back after all these years
Don't be afraid my dear, now I'm older
'Cause people change, can't you see my eyes
Are they not the same after the lies?
I know I'm like a machine
But I still have dreams, I know one day we will
Sleep for days, come over, come over
I won't make the same mistakes
Come over, come over, I'm dying not to hurt you
In our dreams we can be complete again
When you were young, you kept a list
Of the things you'd miss as you got older
I've known you in every life I've lived
Yeah, I'm still a kid even though I'm colder
When you were a child, I was lost in the wild
But you built a home for me in the road
I was born in the cold, turn up the heat
I know one day we will
Sleep for days, come over, come over
I won't make the same mistakes
Come over, come over, I'm dying not to hurt you
In our dreams we can be complete
If we go to sleep we can wake up home again
Come on over again
Sleep for days, come over, come over
I won't make the same mistakes
Come over, come over, I'm dying not to hurt you
Sleep for days, come over, come over
I won't make the same mistakes
Come over, come over, I'm dying not to hurt you
In our dreams we can be complete
If we go to sleep we can wake up home again
Come over, come over, come over
Come over, come over, come over
