

Growing Up

Jason Lancaster

So what else did I miss? We were staring at the stars
We'd wonder if there is a world out there and is staring back at ours
She leans in for the kiss and then it sent me straight to Mars
The whole world seems to make more sense while we're here in tangled arms I kind of wonder if the words feel
right, if I love her say anything
I'm kind of hoping that tonight is the night that I'll get my chance to see you
I'm always thinking if the song's just right then you'll finally get to see
All the words we speak and the nights we see will always be ours 'Cause growing old's a fact, but growing up is
optional
Tell me can you see that we were made inside a pact
That we said our love was personal
Tell me can you see we, we could be forever now And what else did I miss? I was hoping for the chance
Hoping that this song comes on that'll make you wanna dance
This road was forever seventeen, and leading to romance
It's paved with silver chords
A broken street you have to walk with me 'Cause growing old's a fact, but growing up is optional
Tell me can you see that we were made inside a pact
That was said our love was personal
Tell me can you see we, we could be forever now Tom Petty on the radio, if you don't slow down then you can't
grow old
Can we all take a little bit of time to say these are our perfect days
So blow a kiss, this song was closed with your head held out of a car window
Tell the world that they don't know that you're never going to change 'Cause growing old's a fact, but growing
up is optional
Tell me can you see that we were made inside a pact
That was said our love was personal
Tell me can you see
Oh 'cause growing old's a fact, but growing up is optional
Tell me can you see that we were made inside a pact
That was said our love was personal
Tell me can you see we, that we could be forever now
