Julie

Emily Kinney

Let go of Julie, and take my hand
Let go, it's time to be my man
Let go of Julie and kiss my face
She's standing, she is standing in my place

And I'm not normally the jealous, jealous type
But I imagined it'd be you and me tonight
And I bet Julie's really smart
Oh, you keep saying she's so cool
But if you pick her over me, you're just a fool

So take home Julie, we'll be drinking at 2
Take home Julie, we've got catching up to do
Just take home Julie, take up my heart
I am ready, I am ready to start

I said I was alone and you just laughed out loud
How do broken hearts make you so proud?
Left a comfy bed, I left my lover of a year
To be with you, be with you here

And I'm not normally the jealous, jealous type
But you deserve a girl with matching sparkly eyes
A girl who makes you dance 'til dawn
And makes you wanna write a song
And if you think that that is Julie, you're wrong

So take home Julie, we'll be drinking at 2
Take home Julie, we've got catching up to do
Just take home Julie, take up my heart
I am ready, I am ready to start

So take home Julie, we'll be drinkin' it too
Take home Julie, we've got catching up to do
Just take home Julie, take up my heart,
I am ready, I am ready to start

I'm staring at the ground as she walks right by
You're staring at me now 'cause I refuse to say "hi"
I'm just staring into space 'cause all I got on my mind

Elevator kisses summer summer time
Elevator kisses you and I

And I'm not normally the jealous, jealous sort
But if we're picking favorites, I am yours
And I know Julie doesn't drink
And I'm just hanging at the bar
So go ahead and call up Julie a car
Yeah, go ahead and call up Julie a car

So take home Julie, we'll be drinking at 2
Take home Julie, we've got catching up to do
Just take home Julie, take up my heart
I am ready, I am ready to start

So take home Julie, we'll be drinking at 2
Take home Julie, we've got catching up to do
Just take home Julie, take up my heart
I am ready, I am ready to start

No, I'm not normally the jealous jealous type
But I imagined it'd be you and me this time
And I bet Julie's really smart
Oh, you keep saying she's so cool
But if you pick her over me, you're just a fool
