

So High So Low

Matisyahu

Ohhh... oh eh oh. When the time is right
I leave this place tonight
just leave everything behind
it's time to face my life We'll try to find the cross back
and slap back to a crack in time
is anyone on the other side
seek and you might find so high
so low
I don't know where but we got to got to go there so high
so low
don't know where but we got to got to go there
got to go there
Why not give up
Buck up, drop down
why not lie down and never wake up
give in give up and don't get up
give in to the ground who gives up
she is frozen in time
behind the enemy line
in the nighttime she stares
down the highway
which way is the right way?
walkin through this world on a tightrope
a memory door swings both ways
hear me now
in the outside, buckle up
it's gonna be a bumpy ride now
it's gonna be a bumpy ride now
so high
so low
I don't know where but we got to got to go there
(got to go there) so high
so low
I don't know where but we got to got to go there
(got to go there) I am searching for the shade of the tree
heard about it from a tune in the breeze
say it exists on the side of the road
but which road?
nobody was told

(so low)All I know is I must find
a road that leads where nobody goes
(so low)I can't roll down all the windows
where the wind blows down those spears and folds
(so high)so let go of the steering wheel
let go, let go
(so low)all I know is I must find a road that leads where nobody goes
let go of the steering wheel
let go, let go so high
so low
I don't know where but we got to go to go there
(got to go there)so high
so low
I don't know where but we got to go to go there
(got to go there)
(got to go there)
