

Golden Touch - Full Length

Razorlight

I know a girl with the golden touch
She's got enough, she's got too much
But I know, you wouldn't mind
You could have it all if you wanted
You could have it all if it mattered so much

[Chorus]

But then all they know is how to put you down
When you're there, they're your friend
But then when you're not around
They say, "Oh, she's changed"
We know what they mean
Well they mean, they're just jealous
Because they never do the things
That they wish that they could do so well

That kind of girl, yes she's never alone
You leave a thousand messages on her phone
But you know you never get through
And you could have it all if you wanted, girl
You could have it all if it matters to you

[Chorus]

I saw my girl with the golden touch
Give 'em a taste but not too much
I just can't listen to the words of fools
I don't give away too much
Someone will need your golden touch

[Chorus: x2]
