

# liquid cool

## Redlounge Orchestra

Certainly someone who is frozen is not alive  
But neither are they dead they are in a third state  
    A biostasis what I would use to describe  
Liquid coolMake me immortal, yeah, yeah  
    I am immortal, yeah  
    I am nothing, yeah, yeah  
Becoming liquid coolWaves of oblivion, yeah, yeah  
    Lap at my feet, yeah  
    Laugh in my face, yeah, yeah  
Devil take me liquid coolI is another, yeah  
    We blackout together, yeah  
    Our little death, yeah, yeah  
Twilight elixir liquid coolMake me immortal, yeah, yeah  
    Once more around the sun  
    Uber religion, yeah, yeah  
Ultra-evolution liquid coolHe who lives these words  
    Shall not taste death  
    Becoming nothing, yeah, yeah  
Forever liquid coolThe number seventy-two  
    Living in another lifetime  
    The number seventy-two?  
Future onesTo get into some place in the future  
    Where nobodys ever beautiful  
    But someday well look back and wonder  
    How we ever tolerated it, life and death
