Hollow Earth

The Kovenant

Dead center in the middle of nowhere
Coma existence surrounded by the living dead
There is no hope, there is no tomorrow
You took our world and you bled it dryThese are the last days of planet earth
(And) we will be there when they realize the truth
We're spinning around on our way to hell
We can never get off this carousel
These are the last days of planet earthVictims of a defective genepool
Soulless existence forever in pointless directions
Out of tune with true evolution
There are no answers, there is no solutionThese are the last days of planet earth
(And) we will be there when they realize the truth
We're spinning around on our way to hell
We can never get off this carousel
These are the last days of planet earth"The heart of a mystery is seen through imagination
But obscured by our inability to control chaos "We're spinning around on our way to hell
We can never get off this carousel
These are the last days of planet earth
We're spinning around on our way to hell
We can never get off this carousel
These are the last days of planet earth
