

# If You Must Leave My Life

**Richard Harris**

Standing in my eyes  
You'll always be the reason  
But I knew I couldn't keep you for good  
And I'm not even sure that I should But girl, if you must leave my life  
You leave me alone  
And baby, long before you leave my life  
Be sure you have your own Somewhere in my mouth  
There'll always be the taste of you  
Forever is so very long  
I don't want your life to go wrong So girl, if you must leave my life  
Consider every part  
And baby, long before you leave my life  
Be sure you have your heart 'Cause if it's not there  
When you unpack  
It might not be here  
When you get back
