Last Time Out

Common Children

Feeling went away in the fire
And the fire is still burning
Someone said that we are all liars
It's amazing what I'm learningAll the words you say
When you talk and you talk that way
Burn and melt away
We cry and we dieHide ourselves inside the sarcasm
The whisper of your name
Another game of jokes and laughter
Clown without a faceAnd all the leaves fall down
With our words dying on the ground
Promises never found
We hide and we lieWould you say what's on your mind
If you knew it was the last time
Has it all been a waste of life
When you know it's the last timeWould you say what's on your mind
If you knew it was the last time
Has it all been a waste of life
When you know it's the last timeThe last time, the last time
The last time, the last time
The last time, the last timeWould you say what's on your mind
If you knew it was the last time
Has it all been a waste of life
When you know it's the last time
