

Thing Called Love (DubRocca Remix)

Above & Beyond

There was a time
There was a place
But there was fear inside
A witty lie to save my face
The parachute of pride
To cross the line takes a tiny step
But will this spark cause the bridge to burn
My fear entwined with my regret
I'll be the path for safe return So here we are
All just the same
But you will never know
My secret plan
How close we came
To share another role
I haven't lost my only chance
To tell you how I feel inside
Is it just me
I'd like to know
Or are we all just a little blind? There's a thing called love
That we all forget
And it's a wasted love
That we all regret
You live your life just once
So don't forget about a thing called love
Don't forget, forget about a thing called love There's a thing called love
That we all forget
And it's a wasted love
That we all regret
You live your life just once
So don't forget about a thing called love
Don't forget, forget about a thing called love
