

# Computer Fuckers

## NFW

we are the emptiness  
we are the men who build computers  
we are the emptiness  
we are the men who build computers

we have no common sense  
you'll see us taking over the future  
we have no common sense  
we don't deserve to have a future

that's why we have one  
that's why you have none

young boys with syndromes like attention deficit hyperactivity disorder  
will walk around like there's only one way, and that's the fucking computer  
be stoned and downwards like a paralyzed out-of-the-90s-shoegazer  
while a secret virtual life expresses the way that you should have known better
