Death Certificate

Carcass

A grim myriad, a gray kaleidoscope
Sterile, constrating
Born and die, institutionalized
A bleak epitaph, an apalogue so sadCross indexed, cross dissected
Cross referenced, contabescenceCross indexed, cross bisected
Cross referenced, certificate of deathMachine coded, reduced to hard memory
In a data base
Digitalized, statistical obituary
You only legacy, your final resting placeCross indexed, cross dissected
Cross referenced, contabescenceCross indexed, cross bisected
Cross referenced, certified deadCross indexed, cross dissected
Cross referenced, contabescenceCross indexed, cross bisected
Cross referenced, certificate of death
