Take Possession

Jean Shepard

You can take possession darling
When I hear you say I do
When you slip a ring on my finger
Take possession, I belong to youSome folks give away their love too soon
When their feelings make them blind
But I'll wait until my honeymoon
For I'll still be old fashioned kindYou can take possession darling
When I hear you say I do
When you slip a ring on my finger
Take possession, I belong to youWhen you take me in your arms each night
And you say what I want to know
We can let temptation burn too bright
Even though I do love you soSurely love can wait
If love is great please protect me
When we're alone keep the flame of love real low
My love, till my name's the same as your ownYou can take possession darling
When I hear you say I do
When you slip a ring on my finger
Take possession, I belong to you
