Sleepeater

Shihad

Balanced on the edge of a knife
Sleepeater slowly turning
Break it down set it alight
He's here to start it burning
Wait until you're in the bedroom
Know that you're alone at night
Wanna see it live forever
Hoping you can keep it tight
Everything you ever valued
Know that you will have to fight
Wanna see it live forever
And I will take you away from this emergency
At the end of the day you're your own worst enemy
Brothers take your sisters and hide
We see the storm clouds coming
Differences between you and I
Have already
Prepared and started running
Wait until you're in the bedroom
Know that you're alone at night
Wanna see it live forever
Hoping you can keep it tight
Everything you ever valued
Know that you will have to fight
Wanna see it live forever
And I will take you away from this emergency
At the end of the day you're your own worst enemy
And you can take you to heaven put you through hell
Just as long as you don't look down
We can do it together into my arms
Know that nothing can hurt you now
Sleep

Sleepeater
Sleep
Sleep
Sleepeater
Sleep
Sleep

Sleepeater
Sleep
Sleepeater
Sleep
Sleepeater
Sleep
It can take you to heaven put you through hell
Just as long as you don't look down
We can do it together into my arms
Know that nothing can hurt you now
And I will take you away from this emergency
At the end of the day you're your own worst enemy
And you can take you to heaven put you through hell
Just as long as you don't look down
We can do it together into my arms
Know that nothing can hurt you now
Sleep
Sleepeater
Sleep
Sleep
Sleepeater
Sleep
Sleep
Sleepeater
Sleep
Sleepeater
Sleep
Sleepeater
