Horse to Water

R.E.M.

I could have kept my head down
I might have kept my mouth shut
I should have held my own

You lead a horse to water and watch him drownYoure only as big as your battles

Rattle my cage with your shadow

Im a bantam weight with a mouthful of feathers

Dont you know that what comes around goes aroundIm not that easy, I am not your horse to water

I hold my breath I come around, roundDont darken my doorstep again

You're mixing up living in chin, chin

You're mixing up lose with win, win

You lead a horse to water and you watch him drownYou stumble on glass top table

TVs chewing shock gone cable

Pump me up a beanstalk fable

And Ill call this entertainment

Cause Humptys falling downIm not that easy, I am not your horse to water

I hold my breath I come around, roundPick a fight an ultra buzzy bubble

Friday night fucking fried up pub crawl

Bantam-weight with a mouthful of feathers

Dont you know that what comes around goes aroundIm not that easy, I am not your horse to water

I hold my breath I come around, round, round

Its not that easy, I am not your horse to water

I hold my breath, I come around, roundIts going down, down, down this run around, round Is bound to pound the daylights out of you
