

# Into the Night

## Alkaline Trio

We'll never know which way this road is gonna turn  
You can't be sure how quick your wick is gonna burn  
So sing to me your darkest secrets, time to leave behind your regrets  
Before we get lost in the blink of an eye This carrion has been forgotten, left for dead in the sun rotting  
The answer lies here in this tragedy, it ends with you and me  
When we're dragged from the light into the night We have been warned which way the storm is gonna blow  
But where the riptide takes us to we'll never know  
Now you're screaming out for Jesus or for anyone, please save us  
Before we get lost in the blink of an eye This carrion has been forgotten, left for dead in the sun rotting  
The answers lie in endless tragedy, it ends with you and me  
When we're dragged from the light into the night So sing to me your darkest secrets, time to leave behind your  
regrets  
Before we got lost in the blink of an eye This carrion has been forgotten, left for dead in the sun, rotting  
The answer lies in end of mystery, it starts with you and me  
When we're dragged from the light into the night  
Into the night, into the night, into the night, into the night
