Back For More

A-teens

I know I might seem weird One day I'm around the next I disappear This is a crazy act But I won't break up, kiss and make up that's a fact 'Cause always, ever, after and on When you think the party's over look over your shoulder I'm at your door, coming back for more Dancing in the moonlight, 'til the break of day like we did before We'll be coming back for more We're on a one-way ride And all I need is someone like you by my side You saw the movie too We'll ride into the sunset like they always do For all days, all nights, hours I'm gone When you think the party's over look over your shoulder I'm at your door, coming back for more Dancing in the moonlight, 'til the break of day like we did before

We'll be coming back for more If I'm still number one The one your looking for I won't be gone for long Now I'll be back for more When you think the party's over Just look over your shoulder We'll be coming back for more When you think the party's over look over your shoulder I'm at your door, coming back for more Dancing in the moonlight, 'til the break of day like we did before We'll be coming back for more When you think the party's over look over your shoulder We'll be coming back for more Dancing in the moonlight, 'til the break of day like we did before We'll be coming back for more
