Save Your Breath

Finger Eleven

It started out of love, and ended real in love

Now they remember us as dynamite and dustSo save your breath, don't fire slings and arrows yet 'Cause silence is all the both of us have leftDon't tell me that you told me so and you saw it coming years ago

I'll tell you every one accountable like a target by the barrel fold

Don't tell me that you told me so and you saw it coming years ago

Coming faster than a cannibal like a target standing ten feet tall

I can't blame 'em all, so you can save yourSave your breath, don't fire slings and arrows yet

'Cause silence is all the both of us have leftDon't tell me that you told me so and you saw it coming years ago

I'll tell you every one accountable like a target by the barrel fold

Don't tell me that you told me so and you saw it years ago

Coming faster than a cannibal like a target standing ten feet tall

I can't blame them all, so you can save yourSave your breath, don't fire slings and arrows yet

'Cause silence is all the both of us have left
