

We Started a Fire

Myzica

Why don't we break the silence?

One kiss is all it takes

Maybe its time we try this

Strike a match and start a flame

I know you want me

I want you

Don't hold back

Just make the move

You know you want to

Baby let the flames rise

Don't be afraid of what your heart desires

We can light up the night

Get caught in a blaze and let our love burn brighter

I feel the heat inside of me

This love will never die

We started a fire

I can just hear those sirens

Smoke signals up above

Never seen nothing like it

Show the world what it means to love

I know you feel it

I feel you

Stop holding back

Just tell the truth

You know you want to

Baby let the flames rise

Don't be afraid of what your heart desires

We can light up the night

Get caught in the blaze and let our love burn brighter

I feel the heat inside of me

This love will never die

We started a fire

Baby let the flames rise

Dont be afraid of what your heart desires

We can light up the night

Get caught in a blaze and let our love burn brighter
I feel the heat inside of me
This love will never die
We started a fire
