Help Me Out God

Superchic[k]

Help me out God
I need a little something
Turn the brights on
I can't see where we're going cause I don't know
when things'll work out just fine
Or if this road we're on leads us up
Or is leading me on down to my wishing well
Where I might drown
Oh I might drown
Cause I can't swim without you God
Help me out God
I need a little something
Hold my hand
So I know that I'm not falling down or spinning around
Or am I really just fine is this the vertigo I fell
Just simply fear or maybe real it's a long way down
And I might fall and I might fall cause
I can't stand without you God
Help me out God
I need a little something
Just enough so I don't lose hope
Before morning comes cause in the sun things'll work out just fine
but this night's been extra long I fear I won't make it to the dawn
Cause the night is dark and I might doubt and I might doubt cause
I can't hope without you God
Just enough for today get me through til tomorrow
