

Make My Day

Gotthard

So you're telling me now all your friends call you honey
There's your name on the wall
and it ain't that funny Guess you're on the street
shakin' legs every night
and the whole world's looking at you
kinda love at first bite And the same old song
I hear you play On and on, again
you gotta make my day Yeah, you drank all my wine N' you gave all my money away
No more gas in the car and your dog wants me to stay
Darling you know you go a little too far
but i'm sure not a pawn on your chessboard
Baby, no more Well; you take it all for granted
you got me hypnotised
so who do you think you are; honey
I want you to make my day Don't need no pretty lies Read my lips
Make my day
