

The Day We Fell Apart (Incorporated Elements)

Kelly Clarkson

Let's go What happened to the man who used to take me straight into misery
I want you back and now I must admit it shames me
How could this be?
Tell me what's this desperation
'Cause I don't recognize, he's changed
I think I made a bad mistake 'Cause once I ran away
I love you since the day, the day I broke your heart
It's more than I could take
I love you since the day, the day we fell apart
Now everything is coming undone
'Cause you were the chance I can't afford to waste
I love you since the day, the day we fell apart I must admit the grass is so much greener on the other side
Since you left I noticed now you're so much meaner
And it's something I think I like
Tell me what's this desperation
'Cause I don't recognize, he's changed
I think I made a bad mistake 'Cause once I ran away
I love you since the day, the day I broke your heart
It's more than I could take
I love you since the day, the day we fell apart
Now everything is coming under
'Cause you were the chance I can't afford to waste
I love you since the day, the day we fell apart I made a bad mistake
Used to pray for space
Drowning you one more time
And mend my wicked ways 'Cause once I ran away
I love you since the day, the day I broke your heart
It's more than I could take
I love you since the day, the day we fell apart
Now everything is coming under (coming under)
'Cause you were the chance I can't afford to waste
I love you since the day, the day we fell apart
The day we fell apart
