

# Food Chain

[Eric Hutchinson](#)

Don't let this affect the game  
Every five months we act the same  
But I never get used to putting you off  
And no one could've scripted this  
Who knows what'll come of it  
I refuse to believe it was all just a waste 'Cause look around, everybody's on the food chain  
Funny but from day to day we get from bottom to top  
And if you get lost you start over again  
But we don't ever get to, no we don't ever get to stop I wake up in the oblivious state  
Go to sleep trying to save some face  
'Cause I've never been one for acting nave  
And so what we've got nothing to prove  
Why on earth would we soften the mood?  
Do we think that this wire is better left live? 'Cause look around, everybody's on the food chain  
Funny but from day to day we get from bottom to top  
And if you get lost you start over again  
But we don't ever get to, no we don't ever get to stop I would've known better if I was on the outside  
I would've known better if I was on the outside  
Looking in, looking in  
But this chain just eats away at the people who use it  
No one's gonna say that it's easier losin'  
Touch with who we need when it's lonelier on the outside Everybody's on the food chain  
Funny but from day to day we get from bottom to top  
And if you get lost you start over again  
But we don't ever get to, no we don't ever get to  
No we don't ever get to, we don't ever get to  
We don't ever get to, we don't ever get to
