

# Feel

## The Verve

This darkness cooled my light  
We move to different sides  
I poured the guilt right over my eyes  
As I rose to greet the sky I've never felt this before  
See you dead on the floor  
I can't recall a single day  
That's gonna make this pain slip away My senses have been so cold  
Didn't know how to feel or hold  
For a second I felt something in you  
For a second I believed in you And I wanna know  
And I wanna be  
And I wanna feel And I wanna know  
And I wanna be  
And I wanna feel And I wanna know  
And I wanna be  
And I wanna feel And I wanna know  
And I wanna be  
And I wanna feel We could, my friend  
We can  
We could, my friend  
We can We should not end  
I wanna be part of [unverified] And I wanna know  
And I wanna be  
And I wanna feel
