

Waiting For Yesterday

12 Stones

It's a long way back to reality, she puts another brick
In the wall of shame she made so long ago
Trying to figure out where things went wrong
Searching through all the lies she told Somehow she missed out on all the things that she needed most
Days spent wondering why this life is so cold
And nothing ever changes Screaming for attention
Watch the sun steal yesterday
Hiding all emotion far away Trying to find his self confidence
Another broken heart behind the painless smile
That he shows reminded that yesterday is so far gone
And tomorrow is still a miracle Somehow he missed out on all the things he needed most days
Spent wondering why this life is so cruel
And nothing ever changes Tomorrow's still a miracle
