Places Named After Numbers

Frank Black

Beyond below above
A gravity that slumbers
At the center of
Places named after numbers
Different kind of loveShe was right
She was right there
She was right there all the time
Collapsing all the wayAnd though it seems from here
That she was never there
Light beams disappear
Into her blackened hair
I wonder if they reappearShe was right
She was right there
She was right there all the time
Collapsing all the way
