

# We Live in an Expanding Universe

**Kelley Polar**

In less than a second  
Wonderful second  
Then there was the whole world  
Whole world, whole world  
There is a pattern  
A wonderful pattern  
That runs through it all  
And some day will know  
Where all things go

It took a single creature  
Wonderful creature  
To cover the whole world  
Whole world, whole world  
There is a pattern  
All the numbers fall  
And some day we'll know  
Why all things grow  
And we'll understand  
Why a (?) expands

We live in an expanding universe  
We live in an expanding universe  
We live in an expanding universe  
We live in an expanding universe
