

Shore Leave

Catatonia

From London to Lisbon
And all points between
Find people to lean on
And one man to please We all need someone
We all need something
We all need? I'm lustless, lifeless
The scent of my skin
It means nothing without you
That's where it begins We all need someone
We all need something
We all need? We all need? Get out for your sakes
Do you want it?
No promises are spoken
Take it or leave it, do you like it? And no man's heart gets broken
One day to another
I'm head over heels
One room to another
It sets the same scene We all need someone
We all need something
We all need? We all need? Every man for himself
Just for a little while
Every man for himself
Just for a short while You could come around
We could fool around and get down
It's the way it could be Oh, from London to Lisbon
I'm head over heels
Take it or leave it
Just come as you please We all need someone
Somewhere, somehow
